093.16.1

16-way jumper link

Rated values

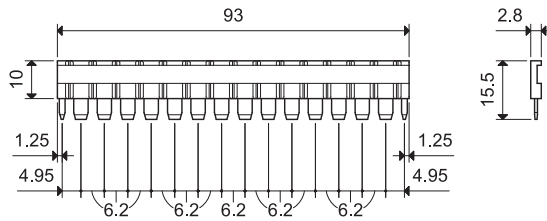

093.16 (blue)

093.16.0 (black)

093.16.1 (red)

36 A - 250 V

Possibility of multiple connection, side by side

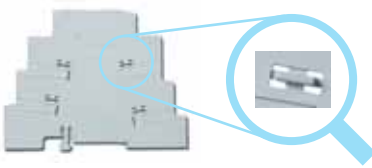

093.60

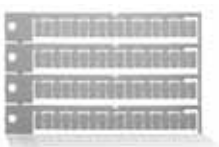

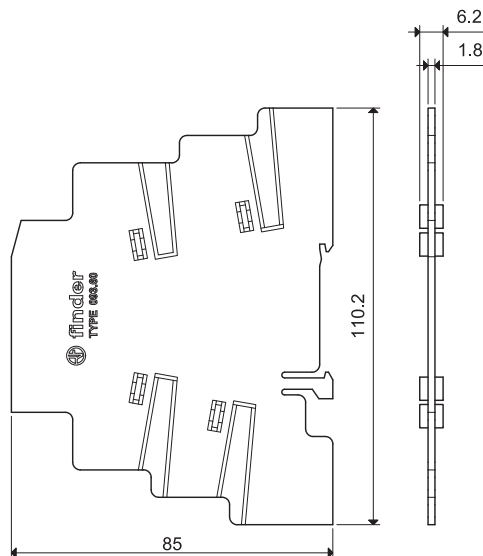

Dual-purpose plastic separator (1.8 mm or 6.2 mm separation)

093.60

1. By breaking off the protruding ribs (by hand), the separator becomes only 1.8 mm thick; useful for the visual separation of different groups of interfaces, or necessary for the protective separation of different voltages of neighbouring interfaces, or for the protection of cut ends of jumper links.

2. Leaving the ribs in place provides 6.2mm separation. Simply cutting (with scissors) the relevant segment(s) permits the interconnection across the separator of 2 different groups of interface relays, using the standard jumper link.

060.72

Sheet of marker tags, plastic, 72 tags, 6x12 mm

060.72
