Fully shielded, the luminaires HERMETIC LEDs Kian have Degree of Protection IP 65 being resistant to jets of water, moisture, dust and vibrations. Can be applied in internal and external spaces ideal for commercial environments and industrial plants subject to humidity and water jets.

Suitable for food preparation locations this luminaire does not require the use of additional lamps. In addition to high photometric performance, allows great savings in consumption.

Advantages

- Long durability.
- Quick and easy installation.
- Weather resistant finish.
- Shielded against insects.
- Work well in casualties temperatures.

APPLICATIONS

industrial environments.

External environments that require robust and high degree of protection.
